# The impact of Document Management Software: Reinventing the Accounts Payable Process

*Every business has invoices to pay. Whether you have one clerk or a team of 20, the Accounts Payable (AP) process is universal and one of the most heavily stricken by paperwork. The constant influx of invoices, purchase orders and packing slips can seem never ending, one pile after another.*

Even worse, managing paper-based documents can drive up costs and create inefficiencies in daily performance. From fraudulent charges, to missed deadlines and double payments (yes, I said DOUBLE), the best way to ensure your invoices are paid properly is by taking your AP process digital.

**Document management software reinvents paper-based accounting**

I get it, change is hard. But no company wants to mismanage their financial data. Handling nearly all payments outside of payroll, AP departments need structured processes to prevent the common mistakes bound to managing paperwork. Document management software not only helps organise your AP department to operate more efficiently, but also provides advantages in productivity and collaboration, all while saving on spend with no time wasted. What's not to love? Let's take a closer look at how document management software reinvents paper-based accounting:

## Automate invoice approvals and payments

Paper-based invoicing can lead to delays if someone is unavailable or out of the office, causing missed payments and an increase in costs. Even dropping an invoice on an associate's desk is at risk of being thrown out, lost or viewed by the wrong eyes.

With document management software, your invoices are secure and yet always available from the convenience of your workstation. Out of office? No problem. Users can view digital files and start the approval process from a laptop, tablet or smartphone – and no one will even know you're still in bed! Alerts can also be set up to notify users when new invoices are ready to be reviewed and approved, automatically sending the documents in question to the appropriate recipients. Additionally, much of the main focus of AP departments is on the three-way match. The key to getting an invoice approved quickly is validating that you received what was intended to be purchased, and that the terms and amounts match the invoice and original purchase order. Document management software keeps files organised and accessible for instant matching.

## Data Entry: Visibility, Productivity & Accuracy

What was that purchase order number? How many pens did we order? Where is our package? With document management software, questions like these are a thing of the past. Search via index information, body text or even date range. Special characters can also be used to further filter results. Voilà! Document management software lets you find what you need when you need it. But let's go back. Before we can search for a document, we need to capture it. Manually entering paper invoices can lead to entry errors and data loss. Document management software allows users to capture the necessary data through Optical Character Recognition (OCR). Place a stack of paper invoices on your office equipment device and move on to tasks of higher importance. Built-in OCR capabilities will scan each document individually, grabbing all of the key data and automatically filing into 'Archives.' Set, scan and forget – OCR does the work for you.

## A paperless solution

### End the Constant Compliance Worry

Do you know if business rules are being enforced? Are you prepared to prove your company's compliance with the SEC, FINRA or ESIGN regulations? Document management software can help your business tie together all the important documents needed during an audit. Purchase orders, delivery receipts and check images can all be instantly and digitally available to anyone with user-based permissions. These features can also help manage compliance risks by controlling policies and having a quicker response time to legal or regulatory actions. What about protection? Monitoring signatures and irregularities makes it hard for companies to protect themselves from fraud. But digital approvals identify which user took action and creates a reliable audit trail that can be easily used and viewed, validating the history of each and every document.

**Paying your vendors on time is critical to the success of your business. Whether your company is big or small, with paper-based accounting methods it can be hard to keep track of where everything is located and what has been fulfilled. A paperless solution could prevent all of the issues that AP departments face, while keeping processes structured and well managed.**

**NEW**

## A4 COLOUR SERIES

offers rich functionality and smooth integration with A3 devices

*Konica Minolta has introduced the bizhub C3351 series, comprising three colour devices, to the local market. The new A4 series combines high-end quality, reliability and solution connectivity with a large number of customisation possibilities, in order to meet the latest market demands and business challenges.*

### Smooth operation and enhanced customisation features

“As successors to the bizhub C3350 series, the new MFPs offer Konica Minolta’s renowned high quality and reliability standards, as well as providing improved customisation features and state-of-the-art connectivity options. These machines integrate seamlessly into existing office environments, meeting high-level demands.

User interface customisation specifically allows for operators to tailor the seven-inch multi-touch screen to fit their individual needs - by adding shortcuts, widgets, applications or the customer’s company logo – while enabling greater levels of efficiency in the preparation of smaller and more complex copy, print, scan and fax jobs,” explained Greg Griffith, business solutions product manager at Konica Minolta.

Thanks to the user interface, identical to that used by Konica Minolta A3 devices, operation is easy and intuitive. The tablet-like operation panel supports pairing with mobile devices and services, such as Apple AirPrint and Google Cloud Print, to further increase workflow flexibility and improve mobile device collaboration. With its multi-touch-screen, the bizhub C3351 machine provides seamless usability between devices, including other MFPs, PCs, tablets and smartphones.

By also using the same controller as Konica Minolta’s A3 MFPs, the bizhub C3351 series is not only suitable as a main device in small- to medium-sized offices, but as a satellite device in large offices too.

### State-of-the-art technology

The series is perfectly suited for offices that require high-end quality devices with advanced technology, but with limited space available. For the convenience of creating A4 documents, one device of the new series even comes with a built-in staple finisher. By having integrated state-of-the-art technology, the series presents itself with competitively low energy consumption and enhanced environmental performance.

# Using the serverless Pull Printing Function with LK-114

*The LK-114 provides enhanced printing convenience allowing the release of print jobs on any Konica Minolta MFP in the fleet. Documents and their information stay secure, as printing will only start after the user has authenticated directly at the chosen output device. At the same time, the LK-114 relieves IT administrators from various management and maintenance duties, with the MFP doubling as a print server.*

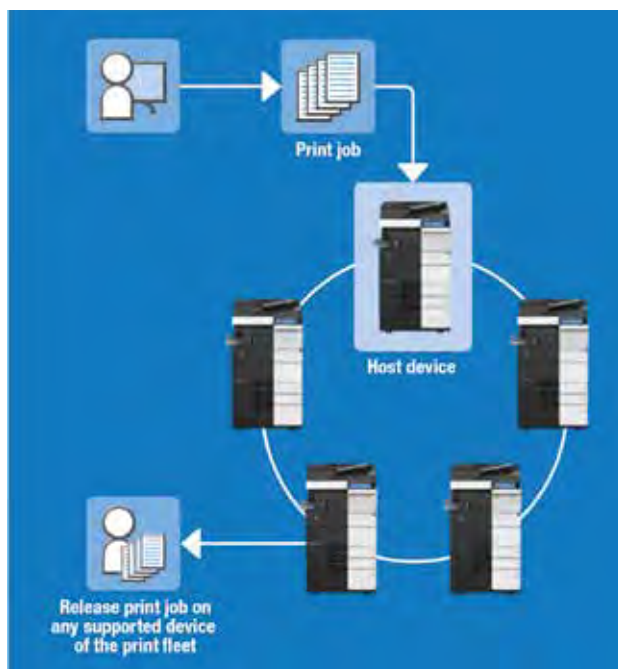

## What is LK-114?

LK-114 'Serverless Pull Printing' is a Follow Me printing solution using one of the MFPs as a storage device, instead of a print server, to store and spool print jobs.

Print jobs can be received/printed at any device belonging to the Pull Printing group, as in a regular Follow Me print environment being based on a server with a dedicated application.

Print job release requires authentication by the user.

LK-114 is provided as i-Option and is required for all devices belonging to the Pull Printing group.

## Benefits of Serverless Pull Printing

### Common benefits of Pull Printing

- Secure printing due to job release based on authentication.
- Reduced print cost and waste, as print jobs can be deleted or settings corrected before printing.

### Benefits of Serverless

- No (high) IT skills/resources are required to set-up and maintain the:
  - 1) Server
  - 2) Follow Me application
- Costs are reduced as no server hardware and maintenance is required or, existing server(s) could be released from:
  - 1) Network traffic
  - 2) Spooling workload

# Konica Minolta introduces Document Accounting Software for professional and secure client billing

*Konica Minolta has launched an enterprise platform which integrates directly into legal practice management systems, such as ProLaw, Tabs3, PC Law and Timeslips, Proman and more, offering an ideal option for billing back clients and matter accounts.*

“The software essentially allows the legal practice to spend more time working and less time worrying about the billing process; of course, this has a direct effect on keeping print costs in check through printing efficiency and flexibility,” said Mohammed Vachiat, software product manager at Konica Minolta.

He highlights that with its innovative low-cost architecture, modular software approach and add-on options, this application provides a full range of benefits, such as:

- Allows for billing of prints, copies, scans, faxes, phone calls to clients, matters and projects;
- Improves recoveries with automated disbursement billing;
- Frees up admin staff time from manual disbursement capture;
- Reduces waste;
- Discovers optimal deployment of office equipment;
- Better supply management;
- Controls access to office equipment; and
- Centralises the management of printing infrastructure.

Advantageous too, is the software’s capability to offer variable pricing between users, clients, matters and projects – that is, calls can be priced according to the number dialled with per second charging. Its simple administration, which aligns with environmental policies and extensive graphical reporting capabilities, adds an additional edge to the software.

To ensure a sound workflow of the law practice, the embedded copier interface is consistent with the workstation print interface, meaning users only have to learn one system and one set of terminology.

Offering efficient print queue management as well as the convenient definition of print policies and rules, Vachiat points out that the solution effectively answers the legal sector’s requirements with regard to reliable output management.

Importantly too, because it is installed on an organisation’s server the application can also track, manage and account for any print job produced on the network. In addition, the applications, monitoring and accounting capabilities can include local printers, providing full control and transparency with regard to what is printed when, by whom and on which device.

Users benefit from secure printing because confidential print jobs are no longer lying around unattended in output trays, where they might fall into the wrong hands.

# Buyers Laboratory honours 'bizhub MarketPlace' with **TOP AWARD**

*Konica Minolta is pleased to announce that 'bizhub MarketPlace' has clinched a prestigious 'Pick' award for 'Outstanding MFP App Ecosystem' from the analysts at Buyers Laboratory LLC (BLI), the world's leading independent evaluator of document imaging software.*

bizhub MarketPlace was developed by Konica Minolta to serve as an online store for licensing and deploying time-saving apps designed for use and to take full advantage of its leading-edge bizhub multifunctional printers (MFPs). The system's apps help streamline workflows and improve efficiencies and also host a User Interface (UI) customisation studio, where clients can create and deploy control-panel UIs, personalised to the needs of their users.

IT personnel (as well as others with a bizhub MarketPlace login), can browse and deploy any of the listed applications to extend the features and functionality of their compatible bizhub MFPs. Administrators can utilise a web-based, intuitive drag-and-drop tool, to create and deploy customised user interfaces. MFP UIs can be populated with specific features needed by the client to tackle desired work-flow processes - thus simplifying use, reducing errors and making it easier for staff to work more efficiently at the MFP. In addition to the DIY capabilities of the UI builder tool, Konica Minolta also offers professional design services through its Solutions Engineering Centre, to create custom UIs for clients. A key feature of the bizhub MarketPlace Chameleon, an intuitive solution that allows organisations to personalise the experience of their MFP, is that users have the ability to customise the UI to conform with company branding.

"Konica Minolta's bizhub MarketPlace is at the forefront in the growing trend of MFP 'app' stores and its added Chameleon features are particularly impressive. You can build custom UIs that will turn multi-step processes into one-touch processes, which will save time and reduce mistakes for users at the MFP," explained Jamie sales, director, Office Workflow Solutions Analysis at BLI.

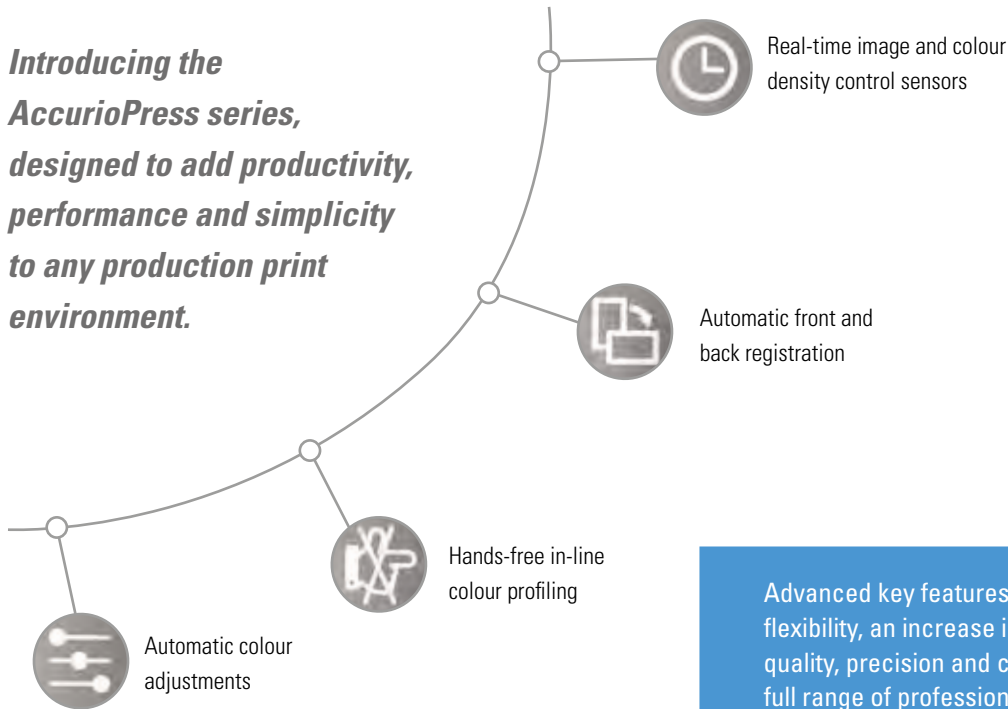

"bizhub MarketPlace presents a new and easy way to browse, purchase and download apps similar to those used on mobile devices, but that are specifically designed for your MFP. This enables businesses of any size or geographic location to essentially transform the way that they work. Receiving this BLI award, acknowledges Konica Minolta's commitment to provide the industry with innovative, ready-to-use business applications," said Greg Griffith, business solutions product manager at Konica Minolta.

## **BLI recognised the platform for many of its strengths, including:**

- Tools that allow administrators and other users to easily create customised control-panel UIs and remotely deploy them via the bizhub MarketPlace portal.
- A wide library of productivity-enhancing apps for scanning, printing, cloud access, communication, security and more, that extend MFP functionality and the user experience
- Easy customisation capabilities to best suit a company or specific department's work flow.
- Cost-saving print management features that can be deployed via the custom UIs.
- Enterprise management features, including simplified app and MFP UI licensing, across a fleet of MFPs from the bizhub MarketPlace admin portal.

# Print standards and expectations being met

**Introducing the AccurioPress series, designed to add productivity, performance and simplicity to any production print environment.**

Advanced key features include improved media flexibility, an increase in productivity, enhanced quality, precision and consistency as well as a full range of professional in-line finisher options.

## Konica Minolta's versatile new series for the commercial printing industry

Konica Minolta's new Accurio Press series sets new standards for superior performance and unsurpassed value, combining digital colour quality that rivals offset prints with advanced work flow and colour management tools that fine-tune accuracy and are designed to keep costs down. It's a comprehensive and fully modular line of digital printing technologies and solutions, including digital press suites, software and cloud-based tools for integrating, managing and executing seamless work flow.

Derived from the word 'accurate', Accurio reflects the advanced, automated and accurate nature of the company's technology.

### Some of the key features include:

- Delivers amazing colour that rivals offset and meets colour standards such as G7, Gracol and FOGRA
- Quickly produces banner prints suitable for book jackets, tri-fold brochures and menus, panoramic posters and more
- Produces completely finished, professional saddle-stitched books ready for distribution

## Some of the new range of bold media options include:

- Printing on heavy paper stocks up to 350gsm and/or 400gsm including auto duplex on this grammage
- Productive high volume 750mm banner printing with the new LU-202XL paper tray
- Extended banner ability up to 1200mm through the external banner tray
- Auto duplex banner size of 762mm
- More productive envelope printing with a variety of configurations
- Specialised media support, textured paper, support for cut-sheet label media
- A wide variety of advanced finishing equipment

"This new, comprehensive and fully modular line of digital printing technologies and solutions maximises the use of resources, reduces labour costs and also increases accuracy and productivity," said Leon Minnie, production print manager at Konica Minolta, "This versatile series meets the print industry requirements for increased output and versatility."

# with the Accurio Press Series

## Konica Minolta's AccurioPress series achieves FOGRA Certification

Konica Minolta's AccurioPress C2070 series was awarded the FograCert Validation Printing System (VPS) certificate.

This high-speed colour digital system takes image quality and consistency to new heights and underwent a series of tests to secure the accolade from the German-headquartered *FOGRA Research Institute for Media Technologies*.

"The FOGRA certification mirrors the feedback we get from customers on the fantastic features and productivity found in the AccurioPress C2070 series. It also highlights that the latest addition in our portfolio meets the highest industry standards offering our customers further quality assurance through world-class productivity, reliability and print quality, for which Konica Minolta is renowned," concluded Minnie.

FOGRA found that the Konica Minolta AccurioPress C2070 series 'fulfils all criteria of this programme in the tested configurations'. It is now certified when running with the optional EFI Fiery, CREO or Konica Minolta controllers.

The Konica Minolta AccurioPress C2070 was tested in a number of configurations and printing conditions for a wide range of capabilities. These included PDF/X conformance, proofing substrate colour, gloss and fluorescence, colour accuracy, uniformity, permanence and light fastness. Tests also considered fading, long and short-term repeatability, rub resistance of the print, colour metric tone value transfer, tone value reproduction limits, image register and resolving power and margin information.

The Konica Minolta AccurioPrint C2070 delivers outstanding colour and registration stability combined with excellent print quality. Its improved thick paper support allows the use of various media types, such as coated and embossed paper up to 350gsm. In addition, a new, large capacity unit for banners up to 750mm in size ensures efficient banner printing, such as book covers and three-fold menus.

## About FOGRA

The objective of the *FOGRA Research Institute for Media Technologies* is to promote print engineering and its future-oriented technologies in the fields of research and development and to enable the printing industry to utilise the results of this activity. The association maintains its own institute, with approximately 50 staff members including engineers, chemists and physicists.

## 'Simply efficient' - AccurioPress C6100 Series

The AccurioPress C6100 Series is available in 85ppm (C6085) and 100ppm (C6100). The fast and flexible series has been created for operations that want to expand their digital printing and are now expanding their service as well as those who need to handle large and/or repeat print volumes.

This new generation of true production systems has been designed to ensure improved uptime and deliver even higher quality printed materials with greater reliability and stability. With the Integrated Colour Care Unit they overcome some of the biggest pain points in digital print production such as time-consuming front to back registration, extensive colour set-up and complex paper set-up operations which are now something of the past.

The AccurioPress C6100 Series will underpin Konica Minolta's market-leading reputation for productivity, reliability and quality. They will meet and exceed the advanced requirements of print production environments at the highest levels, as well as offering digital image quality on par with offset printing. Uptime is assured via highly automated features such as; automates colour adjustment, skill-less operation, constant control of gradation and front-to-back registration.

Enhanced functions, including stabilised paper feeding, support a wide range of paper weights from 52gsm to 400gsm, plus embossed paper, encouraging broader production possibilities. Other enhancements include low-cost envelope printing, via a dedicated fusing unit – all of these features are targeted at growing a printers business. Reliability and stability is further enabled by Simitri HD E toner for higher offset-like natural textures while lower temperature fusing reduces damage to paper resulting in higher quality finishes and improved environmental performance.

The new series also delivers a top-class monthly duty. Collectively all these innovations have been combined into Konica Minolta's fastest and most efficient automated press yet. The AccurioPress C6100 Series has been launched to help operations enhance their bottom-line with a production press that offers maximum uptime and job flexibility for maximum profit.

# PRINTING: A tale of constant innovation in staying relevant

*Few would dispute that the printing industry is one of the most innovative industries around. This is especially true when placed in the context of the last decade or so of digital intrusion. Print in its traditional form still has a place, but we cannot be complacent – printers must be prepared to be continuously innovative in order to stay relevant and be able to compete. Successful printers have become multi-channel service providers, seizing fully the print opportunities that came along with the digital age.*

## Digital - mind the noise

In today's digital world, the art of blogging, social media, the internet, e-mails and other media has taken over and become the new normal. At first glance, this all works towards making the previously traditional communication and marketing channel of print less relevant. Nonetheless, with careful crafting and forethought applied, printing still has a bright future, especially when we tune out some of the 'noise' that comes with the digital world.

To clarify: it is to print's advantage that the internet is confusing and cluttered with many ads and pop-ups that hamper the interaction of users. This chaos – and the fact that most digital ads are not targeted in any way – means, in essence, that digital advertising is not always as effective as presumed. In addition, internet advertising is also becoming increasingly expensive, with everyone vying to be on the first page. This means that the client with the biggest wallet can be the most successful in terms of getting a prime advertising placement, but if the advert itself does not speak correctly to the target market, whether due to sub-standard or obscure message creation or placement, the 'win from the wallet' does not necessarily translate into the advert being received as desired.

**Printers need to realise that they should play a bigger role in the life of the documents they receive and create; looking beyond the one-dimensional printing process to the promotion of the product's existence across many different platforms. In this way, printers themselves become part of the holistic solution that today's communication demands.**

## The bigger communication picture

Against this background of digital noise, the print industry is, in parallel, continuing to evolve just as it has many times before. In addition, we can even say that, for the first time ever, the printing industry is not only changing from one technology to another – as it did back in the day from letter press to photo-lithography formatting – but it now has to compete for its rightful place as a viable communication and marketing channel. We can see that the print industry has never been challenged quite as much as today in its position as the primary, dominant method of communication and that of sharing information.

It is this very competition that has caused the print industry its greatest difficulties for the past few years. However, successful printers have learned to embrace this competitive platform to promote their ongoing existence and further success.

In this regard, a number of studies have been carried out on the effectiveness of print and electronic media as marketing or communication channels. Both have their strengths and weaknesses but neither can claim to dominate over the other. For this reason, being a printer today should not only mean delivering output onto paper using a digital or litho press, it should mean using electronic platforms to deliver e-mail campaigns, posting ads on social media, as well as releasing electronic newsletters along with the printed output. Printers need to realise that they should play a bigger role in the life of the documents they receive and create; looking beyond the one-dimensional printing process to the promotion of the product's existence across many different platforms. In this way, printers themselves become part of the holistic solution that today's communication demands.

### Opportunities in labelling and packaging

There are two further sustainable print products with huge opportunity for printers, namely labelling and packaging. These two areas cannot be replaced with digital media and still require traditional print systems to complete any product. Having said that, label and packaging printers are now at the same crossroads many litho printers found themselves at a decade ago. Although we require labels and boxes for products, it's not to say the processes on how to create them will remain unchanged or traditional. Even today, label and packaging printers are faced with digital requirements, sequential numbering, variable barcodes, versioning of labels, personalised brands, variable packaging, shorter runs and so on. For these printers to stay relevant and to remain competitive, they will need to embrace the digital change and invest in new digital technology to complement their existing print processes. It is evident that the run lengths on labels and packaging are shortening, making it more difficult for traditional processes to be affordable, driving the change to more profitable digital processes and printers.

### The 'sense-ible' thing to do

In addition, print has also become more creative, engaging more senses than only sight. Print has evolved into a tactile product as well, engaging another of the human senses and making itself even more appealing to consumers. With additional inventive options now available, like spot UV coating, spot foiling, UV coat texturisation, UV spot colours, scented coatings and an array of creative laminations, as well as a combination of these, one printed piece can make a real difference in client engagement and leave a lasting impression.

**The following is a report from IBISWorld, which pointed out a few things that should be contemplated if you are in the print industry.**

'Substitutes to commercially printed material, such as online media and advertising, will continue to adversely affect industry activity. The industry will also continue to struggle as digital media replaces paper products. In order to adapt to declining demand, printers will diversify into cross-media products, including multimedia layout and design. Online providers offer mailing at bulk prices, creative services and marketing lists. These online operators will help grow the short print-run market by offering small businesses and households more convenience and a larger range of services at competitive prices. Large online providers will raise the bar for traditional print providers.'

### The evolution continues

The evolution of the internet and associated technologies is here to stay but it certainly won't kill print, it's just another way of communication, just like using different cars or trains for travel. In conclusion, a future without print or paper would have a devastating effect on society. **Think before you don't print.**

# Award winning DIGITAL PRINT TECHNOLOGY, Accurio PRESS C6100

***Konica Minolta has launched its 'simply efficient' Accurio PRESS C6100 Series of colour production printers, which are designed to support highly responsive print environments.***

The fast and flexible series has been created for operations that are expanding their services, as well as those who need to handle large, repeated print volumes. Leon Minnie, manager of production systems at Konica Minolta said, "Commercial printers, CRDs and related operations will all benefit from these efficient presses. This new generation of true production systems has been designed to ensure improved uptime and deliver even higher quality printed materials, with greater reliability and stability. With the Integrated Color Care Unit, they overcome some of the biggest pain points in digital print production such as time-consuming front to back registration, extensive colour set-up and complex paper set-up operations which are now something of the past."

"These presses will underpin Konica Minolta's market-leading reputation for productivity, reliability and quality. They will meet and exceed the advanced requirements of print production at the highest levels, as well as offering digital image quality on par with offset printing. Uptime is assured via highly automated features such as automated colour adjustment, skill-less operation, constant control of gradation and front-to-back registration. Enhanced functions, including stabilised paper feeding, support a wide range of paper weights from 52gsm to 400gsm, plus embossed paper, encouraging broader production possibilities. Other enhancements include low-cost envelope printing, via a dedicated fusing unit – all of these features are targeted at growing a printer's business. Reliability and stability is further enabled by Simitri HD E toner for higher offset-like natural textures while lower temperature fusing reduces damage to paper resulting in higher quality finishes and improved environmental performance. The new series also delivers a top-class monthly duty cycle while parts have a long life. Collectively all these innovations have been combined into our fastest and most efficient and automated press yet. It has been launched to help operations enhance their bottom-line with a production press that offers maximum uptime and job flexibility for more profit in the print room," added Minnie.

With all these enhancements and industry leading technology it is of no surprise that the newly manufactured Accurio PRESS C6100 has already been awarded Outstanding Colour Mid-Volume Production Device by independent and global renowned digital imaging test laboratories, Keypoint Intelligence – Buyers Lab. "Superior productivity, media handling, high quality and consistent output distinguish the Konica Minolta Accurio PRESS C6100 from the pack, in the ever competitive and growing mid-volume production colour space," said David Sweetnam, Keypoint Intelligence – Buyers Lab Director and Lab Services for EMEA/ASIA. Over the course of its testing, the device proved it can capably and quickly handle most media sizes and types thrown at it up to 400gsm. Air suction – aided feeding in all paper sources, a second transfer belt, and robust finishing options all bring a level of flexibility to media, superior to that of many of its competitors. A well laid-out Fiery print driver and excellent job management raise the ease of use to the next level.

"If you're to maximise uptime, the Accurio PRESS C6100 delivers on all fronts. The device maintains high-level output quality over both short and long-run jobs with minimal operator interaction required. In fact halftone imagery was to an exceptional standard even in default mode. Fine lines and text were also of a very high standard. The new Integrated Colour Care Unit automatically sets up gradation, maximum density adjustments, front to back registration, media profiling and grayscale balance adjustment, all in real time without impacting productivity. In addition, an inline spectrophotometer allows media profiling to be conducted without the need for manual measurements," said George Mikolay, Keypoint Intelligence – Buyers Lab associate director of production.

<b>Power consumption</b>	220-240 V / 50/60 Hz Less than 1.2 kW (system)
<b>System dimensions</b>	447 x 544 x 500 mm (W x D x H)
<b>System weight</b>	Approx. 30 kg

### COPIER SPECIFICATIONS

<b>Copying process</b>	Electrostatic laser copy, tandem, indirect
<b>Toner system</b>	Simitri <sup>®</sup> HD polymerised toner
<b>Warm-up time</b>	Approx. 38 sec. <sup>3</sup>
<b>Copy resolution</b>	600 x 600 dpi
<b>Gradation</b>	256 gradations
<b>Multi-copy</b>	1-99
<b>Original format</b>	A6-A4
<b>Magnification</b>	25-400% in 1% steps; auto-zooming
<b>Copy functions</b>	Duplex copy; ID card copy; 2-in-1; 4-in-1; poster; density adjustments

### PRINTER SPECIFICATIONS

<b>Print resolution</b>	1,200 x 1,200 dpi
<b>Page description language</b>	PCL 5e/c PostScript 3 PDF 1.7 XPS <sup>1</sup>
<b>Operating systems</b>	Windows VISTA (32/64) Windows 7 (32/64) Windows 8 (32/64) Windows Server 2003/2008 (32/64) Windows Server 2012 (64) Macintosh OS X 10.x Linux Citrix
<b>Printer fonts</b>	80 PCL Latin 137 PostScript 3 Latin
<b>Print functions</b>	Direct print <sup>4</sup> of TIFF, XPS <sup>1</sup> , PDF and JPEG; XPS <sup>1</sup> and OOXML (DOCX, XLSX, PPTX); secure print <sup>1</sup> ; combination; n-up; poster; overlay; watermark

### SCANNER SPECIFICATIONS

<b>Scan speed</b>	Up to 30 ipm (mono/colour)
<b>Scan resolution</b>	Max.: 600 x 600 dpi
<b>Scan modes</b>	Scan-to-eMail (Scan-to-Me) Scan-to-SMB (Scan-to-Home) Scan-to-FTP Scan-to-USB Scan-to-HDD <sup>1</sup> Scan-to-DPWS Network TWAIN scan
<b>File formats</b>	TIFF; PDF; Compact PDF; JPEG; XPS <sup>1</sup>
<b>Scan destinations</b>	250 (shared with fax); LDAP support

### FAX SPECIFICATIONS

<b>Fax standard</b>	Super G3 (optional)
<b>Fax transmission</b>	Analogue PC-Fax
<b>Fax resolution</b>	Max.: 600 x 600 dpi (ultra-fine)
<b>Fax compression</b>	MH; MR; MMR; JBIG
<b>Fax modem</b>	Up to 33.6 Kbps
<b>Fax destinations</b>	250 (shared with scan); LDAP support
<b>Fax functions</b>	Polling; time shift; PC-Fax

<sup>1</sup> 1 HD-P06 optional hard disk enables secure printing, proof-then-print, print & hold, job storing, XPS emulation, i-Option support and ID card reader support

<sup>2</sup> If the maximum volume is reached within a period of one year, then a maintenance cycle must be performed.

<sup>3</sup> Warm up time may vary depending on the operating environment and usage

<b>Tray 4</b>	1,000 sheets, A4, 52-256 gsm
<b>Large capacity tray LU-301 (optional)</b>	3,000 sheets, A4, 52-256 gsm
<b>Large capacity tray LU-204 (optional)</b>	2,500 sheets, A4-SRA3, 52-256 gsm
<b>Manual bypass</b>	150 sheets, A6-SRA3, custom sizes, banner, 52-300 gsm
<b>Automatic duplexing</b>	A5-SRA3; 52-256 gsm
<b>Finishing modes (optional)</b>	Offset; group; sort; staple; punch; post insertion; z-fold; centre-fold; letter fold; booklet
<b>Output capacity</b>	Max.: 3,300 sheets (with finisher)
<b>Output capacity</b>	Max.: 250 sheets (without finisher)
<b>Stapling</b>	Max.: 100 sheets or 94 sheets + 2 cover sheets (up to 209 gsm)
<b>Stapling output capacity</b>	Max.: 1,000 sheets
<b>Letter fold</b>	Up to 3 sheets
<b>Letter fold capacity</b>	Max.: 30 sheets (tray); unlimited
<b>Booklet</b>	Max.: 20 sheets or 19 sheets + 1 cover sheet (up to 209 gsm)
<b>Booklet output capacity</b>	Max.: 100 sheets (tray); unlimited
<b>Copy/print volume (monthly)</b>	Rec.: 80,000 pages Max. 1: 275,000 pages
<b>Toner lifetime</b>	Black 47,200 pages; CMY 31,500 pages
<b>Imaging unit lifetime</b>	Black 300,000 pages/1,200,000 pages (Drum/Developer) CMY 155,000 pages
<b>Power consumption</b>	220-240 V / 50/60 Hz Less than 2.1 kW (system)
<b>System dimensions</b>	650 x 799 x 1,155 mm (W x D x H)
<b>System weight</b>	Approx. 221 kg

### COPIER SPECIFICATIONS

<b>Copying process</b>	Electrostatic laser copy, tandem, indirect
<b>Toner system</b>	Simitri® HD polymerised toner
<b>Autoduplex speed A4 (mono/colour)</b>	Up to 75 ppm Up to 60 ppm
<b>Warm-up time</b>	Approx. 22 sec. <sup>2</sup>
<b>Copy resolution</b>	600 x 600 dpi
<b>Gradation</b>	256 gradations
<b>Multicopy</b>	1-9,999
<b>Original format</b>	A5-A3
<b>Magnification</b>	25-400% in 0.1% steps; auto-zooming
<b>Copy functions</b>	Chapter, cover and page insertion; proof copy (print and screen); adjustment test print; digital art functions; job setting memory; poster mode; image repeat; overlay (optional); stamping; copy protection

### PRINTER SPECIFICATIONS

<b>Print resolution</b>	1,800 x 600 dpi; 1,200 x 1,200 dpi
<b>Page description language</b>	PCL6 (XL 3.0); PCL 5c; PostScript 3 (CPSI 3016); XPS
<b>Operating systems</b>	Windows VISTA (32/64), Windows 7 (32/64) Windows 8 (32/64), Windows Server 2003 (32/64) Windows Server 2008 (32/64), Windows Server 2008 R2 Windows Server 2012, Windows Server 2012 R2 Macintosh OS X 10.x, Unix, Linux, Citrix
<b>Printer fonts</b>	80 PCL Latin; 137 PostScript 3 Emulation Latin
<b>Print functions</b>	Direct print of PCL, PS, TIFF, XPS, PDF (v1.7), encrypted PDF files and OOXML (DOCX, XLSX, PPTX); mixmedia and mixplex; Easy Set job programming; overlay; watermark; copy protection; carbon copy print
<b>Mobile Printing</b>	AirPrint (iOS), Mopria (Android), Google Cloud Print (optional), Konica Minolta Print Service (Android), PageScope Mobile (iOS & Android)

### SCANNER SPECIFICATIONS

<b>Scan speed (mono/colour)</b>	Up to 180 ipm
<b>Scan resolution</b>	Max.: 600 x 600 dpi
<b>Scan modes</b>	Scan-to-eMail (Scan-to-Me), Scan-to-SMB (Scan-to-Home) Scan-to-FTP, Scan-to-Box, Scan-to-USB, Scan-to-WebDAV Scan-to-DPWS, Network TWAIN scan
<b>File formats</b>	JPEG; TIFF; PDF; PDF/A 1a and 1b (optional); compact PDF; encrypted PDF; searchable PDF (optional); XPS; compact XPS; PPTX; searchable PPTX (optional); searchable DOCX/XLSX (optional)
<b>Scan destinations</b>	2,100 (single + group); LDAP support
<b>Scan functions</b>	Annotation (text/time/date) for PDF; up to 400 job programs; Realtime scan preview

### FAX SPECIFICATIONS

<b>Fax standard</b>	Super G3 (optional)
<b>Fax transmission</b>	Analogue i-Fax Colour i-Fax (RFC3949-C) IP-Fax
<b>Fax resolution</b>	Max.: 600 x 600 dpi (ultra-fine)
<b>Fax compression</b>	MH; MR; MMR; JBIG
<b>Fax modem</b>	Up to 33.6 Kbps
<b>Fax destinations</b>	2,100 (single + group)
<b>Fax functions</b>	Polling; time shift; PC-Fax; receipt to confidential box; Receipt to e-mail/FTP/SMB; up to 400 job programs

<sup>1</sup> If the maximum volume is reached within a period of one year, then a maintenance cycle must be performed

— All specifications refer to A4-size paper of 80gsm quality.  
— The support and availability of the listed applications and functionalities varies depending on operating systems, applications and network as well as network and system configurations.  
— The stated life expectancy of each consumable is based on specific operating conditions such as page coverage for a particular page size (8 pages of A4). The actual life of each consumable will vary depending on use and other printing variables including page coverage, page size, if continuous or intermittent printing, ambient temperature and humidity.  
— Some of the product illustrations contain optional accessories.  
— Specifications and accessories are based on the information available at the time of printing and are subject to change without notice.  
— Konica Minolta does not warrant that any specifications mentioned will be error-free.  
— All brand and product names may be registered trademarks or trademarks of their respective holders and are hereby acknowledged.

PRODUCTION PRESSES: Digital colour

# AccurioPrint C2060L

This production system launched under the new Accurio brand is targeted at small to mid-size commercial printers as well as in-house print rooms and Central Reprographic Departments (CRDs). As an entry-level printing system, it offers outstanding new features including scan and print to/from USB Flash, a dual colour highspeed scanner and the possibility to manage print jobs directly from the operating panel. CRDs will find it easy to adapt to changing document workflows in the company, enhance their overall productivity, and extend their range of products and services by offering new, sophisticated print products.

## Enhances overall productivity

- Colour SRA3+ digital press
- 61ppm A4
- 33ppm A3

PRODUCTION PRESSES: Digital colour

# AccurioPress C2060/C2070

To grow into digital with success means being able to fulfil certain standards, above all to guarantee absolute colour consistency and deliver superb image quality. The products of the AccurioPress C2060/C2070 series take these challenges in their stride. They provide the ultimate performance of up to 1,681 SRA3 pages per hour (AccurioPress C2070).

Combining this with highest media flexibility and professional modular finishing, this is the perfect match for key operator environments.

## High-end print controller

### AccurioPress C2060

PRODUCTION PRESSES: Digital colour

# bizhub PRESS C1100

To build up business by completing a wider range of high-volume jobs more efficiently in the fast-growing digital high print-volume market, in-house printers and graphic communication providers need the highest performance available on the market. Konica Minolta's flagship models for digital colour on-demand printing reliably deliver the higher level of image quality, productivity and price competitiveness that is required by clients' growing demands. With an extremely fast speed of 100ppm and equally high-speed printing for a wide range of paper weights, the bizhub PRESS C1100 achieves superior productivity – giving you more options to grow your business.

## On-demand printing - delivers reliably

- Colour
- SRA3 53ppm
- 100ppm A4
- 53ppm A3

## TECHNICAL SPECIFICATIONS

### SYSTEM SPECIFICATIONS

Resolution	1,200 x 1,200 dpi x 8 bit 1,200 x 3,600 dpi equivalent
Paper weight	55–350 gsm
Duplex unit	Non-stack type; 55–350 gsm
Paper sizes	330 x 487 mm
Maximum image area	321 x 480 mm
Paper input capacity	Max.: 13,890 sheets
Paper output capacity	Max.: 13,600 sheets
Main unit dimensions (W x D x H)	900 x 950 x 1,319 mm
Main unit weight	430 kg

### PRODUCTIVITY

A4 - max. per hour	5,192 pph
A3 - max. per hour	2,762 pph
SRA3 - max. per hour	2,581 pph

### CONTROLLER

External EFI® Fiery Controller	IC-308
External EFI® Fiery Controller	IC-310
External CREO® Controller	IC-309
Internal Konica Minolta own controller	IC-602

\* Based on configuration PF-708

### SCANNER SPECIFICATIONS\*

Scan speed A4	42 opm
Scan resolution	600 x 600 dpi
Scan modes	TWAIN scan; Scan-to-HDD; Scan-to-FTP; Scan-to-SMB; Scan-to-eMail
Scan formats	TIFF (single and multi page); PDF

### COPIER SPECIFICATIONS\*

Gradations	256 gradations
Magnification	25–400%; in 0.1% steps
Multiple copies	1–9,999

### ACCESSORIES

Working table	WT-512
Air suction paper feed unit	PF-707
Air suction paper feed unit with ADF	PF-708
Heating unit for PF-707/8	HT-506
Relay unit	RU-511
Humidification unit	HM-101
Multi (GBC) punching unit	GP-501
Relay unit	RU-510
Auto ring binding unit	GP-502
Folding and punching unit	FD-503
Stacking unit	LS-506
Booklet making unit	SD-506
Perfect binding unit	PB-503
Stapling unit	FS-532
Saddle stitch kit for FS-532	SD-510
Punch kit for FS-532	PK-522
Post inserter for FS-532	PI-502

PRODUCTION PRESSES: Colour Narrow Web Digital Label Press

# bizhub PRESS C71cf

The bizhub PRESS C71cf is ideal for label converters who are looking to shift volumes from conventional presses to digital – due to the reduction of print run lengths, request for faster delivery times, personalisation and versioning as well as production of on-demand runs. The bizhub PRESS C71cf offers outstanding productivity, brilliant image quality and a surprising ease of use: it is the perfect fit for new market expansion and complementary use with existing analogue machines.

- Colour narrow web digital label press
- 18.9m/per min on most commonly used self-adhesive materials

## ACCURIOPRO LABEL IMPOSE (OPTIONAL)

The application not only gives operators a simple and intuitive interface to automatically impose and prepare label jobs for printing. At the same time, the software also enables users to create PDFs as basis for the corresponding cutting tools on the die cutting equipment. Working seamlessly with the bizhub PRESS C71cf, AccurioPro Label Impose perfectly complements Konica Minolta's label press! AccurioPro Label Impose impresses with its PDF-based workflow, which also facilitates creating the correct data input for the creation of die tools, its VDP support, intuitive user interface and large print area of 320mm. Print providers cannot go wrong with the combination of the bizhub PRESS C71cf and AccurioPro Label Impose!

### TECHNICAL SPECIFICATIONS

#### SYSTEM SPECIFICATIONS

<b>Resolution</b>	1,200 x 1,200 dpi x 8 bit 1,200 x 3,600 dpi equivalent
<b>Paper width</b>	330 mm
<b>Max. printing image size</b>	1195 x 320 mm
<b>Printed image width</b>	Max. 320 mm
<b>Feeding speed (printing speed)</b>	18.9 m/min., 13.5 m/min., 9.45 m/min. Speed depends on the paper type (standard speed: 13.5 mm)
<b>Main unit dimensions (W x D x H)</b>	1,171 x 903 x 1,480 mm (operation unit included)
<b>Roll feeder/Roll winder (W x D x H)</b>	930 x 940 x 1,480 mm
<b>Main unit weight</b>	Main unit: 297 kg Main unit + Roll feeder/Roll winder: 949 kg (floor plate not included)

#### CONTROLLER

Internal Konica Minolta own controller IC-602

- The support and availability of the listed specifications and functionalities varies depending on operating systems, applications and network protocols as well as network and system configurations.
- The actual life of each consumable will vary depending on use and other printing variables including coverage, size, media type, ambient temperature and humidity.
- Specifications are based on the information available at the time of printing and are subject to change without notice.
- Konica Minolta does not warrant that any specifications mentioned will be error-free.

- Content management

Document  
Capture and  
Management

## KEY FEATURES

### DOCUMENT CAPTURE

- Content virtualisation
- Universal data access
- Data connectivity
- Content conversion

### CONTENT MANAGEMENT

- Enterprise search
- Data remains in place
- Central portal with SharePoint usage
- Integrated security
- Simple scale-up options
- Mobile application for Android & IOS
- Recently accessed, most assessed and favourites

# YSoft SafeQ

## CHARACTERISTICS

Viable tool for comprehensive user and cost management

Accurate overview of printing operations and costs

Ensures advanced transparency that is required

Output  
Management

## KEY FEATURES

### CENTRAL USER AND ROLE MANAGEMENT

- Centralised user management
- Permission templates
- Centralised authentication management

### COST ASSIGNMENT AND CHARGEBACK

- Print accounting and monitoring
- Automatic tracking
- Tracking of third-party devices
- Individual price calculation
- Flexible cost allocation
- Monitoring of local printers

### BUDGET AND QUOTA MANAGEMENT

- Easy budget assignment
- Periodic budget reset
- YSoft payment system
  - Cash desk reload
  - Self-service reload
  - Credit card reload

### DETAILED OUTPUT AND COST REPORTING

- Web reports
- Management reports
- Export of report results
- Automated reporting

SOFTWARE PRODUCTS

# LK-114

**CHARACTERISTICS**  
 Serverless Pull Printing function  
 Authenticated security  
 LK-114 relieves IT administration

Serverless printing

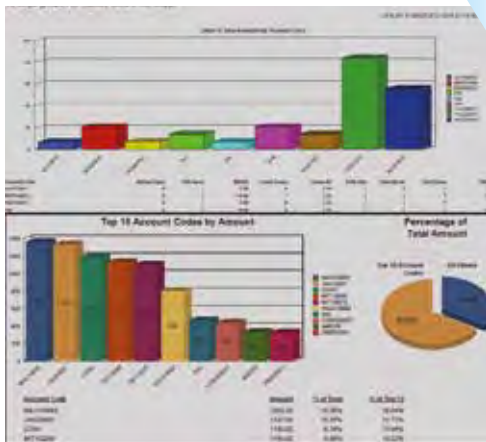

**KEY FEATURES**

- Print jobs can be received/printed at any device belonging to the Pull Printing group
- Print job release requires authentication by the user.
- LK-114 is provided as an i-Option and required for all devices belonging to the Pull Printing group.

**BENEFITS**

- LK-114 boasts a server-less Pull Printing environment, allowing you to print jobs from a PC and temporarily stored on a storage device to any bizhub MFP or printer within the same group (ubiquitous group).
- It enhances convenience and at the same time, contributes to security and reduction of overall costs

# LEGAL

**CHARACTERISTICS**  
 No extra hardware  
 Variable pricing between users/clients/matters/projects  
 'Follow Me' printing  
 Simple administration  
 Extensive graphical reporting  
 Rule based printing and alerts

Output Management

**KEY FEATURES**

- Automated client billing
- Currently supporting AJS, LegalSuite, Legal Interact Practice Manager, GhostPractice, Lawplan, Winlaw and Lexpro
- Integration into other systems available on request

**BENEFITS**

- Allows for billing prints/copies/scans/faxes/phone calls to clients/matters/projects
- Improve recoveries with automated disbursement billing
- Free up admin staff time from manual disbursement capture
- Reduce waste
- Discover optimal deployment of office equipment
- Better supplies management
- Control access to office equipment
- Centralise management of printing infrastructure

SOFTWARE PRODUCTS

# bizhub SECURE

CHARACTERISTICS

- Lock down protection
- Enhanced password and data security measures
- Professional safeguard services

Security

KEY FEATURES

THE FOLLOWING SECURITY FEATURES WILL BE ENABLED ON YOUR MFP BASED ON YOUR MODEL TYPE

- Change administrator password
- Enable hard drive encryption
- Timed automatic overwrite of a file in an electronic folder (Box)
- Automatic Overwrite of temporary image data
- Hard Drive Lock Password
- Timed, automatic Deletion of a file in an electronic folder\*
- Deletion does not overwrite the data on the hard drive

# bEST GUARD

CHARACTERISTICS

- Free security
- Device access control
- Data leakage prevention
- Document security

Security

KEY FEATURES

DATA LEAKAGE PREVENTION

- Automatic image logging
- Powerful database browser
- Log report and e-mail alerts
- Simple set-up
- MFP monitoring and recording

PLEASE NOTE

- The implementation of bEST Guard is only useful in combination with an authentication application
- The application is bound to data protection requirements which can vary in accordance with national regulations

SOFTWARE PRODUCTS

# EveryonePrint

CHARACTERISTICS

- Secure printing
- Flexible job submission
- Support of BYOD corporate policy
- Accounting & charging
- Support of file formats & output settings

Cloud and Mobile Printing

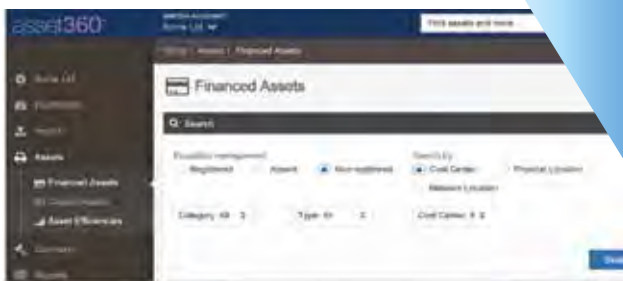

KEY FEATURES

- Administrator-controlled user access
- End-to-end file encryption
- Private print cloud environment
- Follow-me printing
- Guest print scenario
- Secure print job release
- Authentication via PIN
- Authentication by ID card (optional)
- Authentication via user name and password

FLEXIBLE JOB SUBMISSION

- Driver print
- E-mail print
- Web print
- Mobile print
- Google Cloud print

# asset360

CHARACTERISTICS

- Enables a financial facilities and cost accounting view on enterprise assets
- Provides a fixed rental and loan asset registry
- Offers control and governance to capital and non-capital assets

Asset Management

KEY FEATURES

- Enterprise asset management
- Financial management
- Operational cost management
- Cost accounting
- Asset efficiency
- Establishment of geographical entities
- Overall equipment effectiveness
